

STATEWIDE

Case Management & Comprehensive Community Support

Case Management

Case Management is the coordination of services to provide supports for people experiencing frequent setbacks and challenges. Case Management is a vital component to healing from trauma and eliminates stressors of struggles due to homelessness, domestic violence, food scarcity, financial independence, legal support, transportation and parenting support.

Comprehensive Community Support

Comprehensive Community Support Services is a recovery-based program that provides behavioral health support to children and youth in both the community and their homes. Our highly-trained Community Support Workers work with children, youth and their families in order to ensure that their behavioral health needs are being met and work to support those involved in managing symptoms and behaviors in a developmentally informed and trauma sensitive way.

Services offered virtually throughout the state of New Mexico.
