

Understanding Edgenuity Grades

Edgenuity Overall Grade

This is the weighted average grade for **completed activities** based on the grade weights for each type of activity. Students, Parents, and Teachers should reference this grade daily to determine whether a student is beginning to struggle with **mastering the content**. If this metric begins to decrease, the student is not mastering content.

PURPOSE: shows mastery of content and skills in the course

Edgenuity Actual Grade

This is the overall grade **adjusted for progress** if a student is behind. This score doesn't assume zeros for uncompleted work; it simply penalizes for falling behind.

It makes use of a ratio that represents the student's actual progress divided by his/her target progress. This grade will never be higher than the overall grade when students are working ahead.

PURPOSE: shows the impact of pacing on the student's course grade

Edgenuity Relative Grade

This is the grade that a student would earn if he/she stopped working and received 0% for all unscored activities that count toward the final grade. This grade reflects work not completed by the student.

PURPOSE: provides a metric that can be used if a student drops the course

Student Tips

- Check grades in the academic snapshot tab
- Read and respond to messages daily
- Log a minimum of 100 minutes of work time per course each week
- Take e-notes as they can be used on quizzes
- Email/call/text your teacher for help or schedule time for a conference on blackboard
- Take learning into your own hands and let the course guide you
- Use your school mentor for support
